

# Summary of Outstanding Debt

Prepared: 11/17/2018

This chart shows the outstanding general obligation bond debt according to the year it will be paid. The district issued its debt in installments and the legend shows all outstanding issues. When there are issues with the same year followed by an A or B, this means that two separate issues were made during that year. Often this is due to a refunding issue where the district has refinanced at a lower rate.
